Introducing the BN-20D Direct-to-Film

The new VersaSTUDIO BN-20D Direct-to-Film System is designed to meet the growing demand for DTF apparel decoration with a solution that offers superior overall performance and legendary Roland DG reliability. The BN-20D Direct-to-Film System makes it easy for users to customize T-shirts and other fabric goods with vibrant, detailed graphics and text in just four easy steps, with no weeding required. In addition to the BN-20D printer, which offers many of the most popular features of Roland DG's best-selling BN-20 series desktop devices, Roland DGA also offers the ink, powder and film needed to produce DTF graphics (each sold separately).

Key Features Include-

- * Simple DTF process – transfer detailed graphics and fine text quickly and easily without weeding.
- * Unsurpassed reliability and minimal maintenance.
- * When not being used for DTF applications, the BN-20D can also serve as a stand-alone vinyl cutter.
- * Included VersaWorks 6 RIP software – Roland DG's most powerful, intuitive RIP to date.
- * One-Year Trouble-Free manufacturer's warranty.

Stay tuned for more info as our first shipment comes in March... call 888-865-0300 or email info@tyrrelltech.com to learn more!

UV PRINTING OF ALL KINDS Printing On Mugs, Cups & Glasses?!

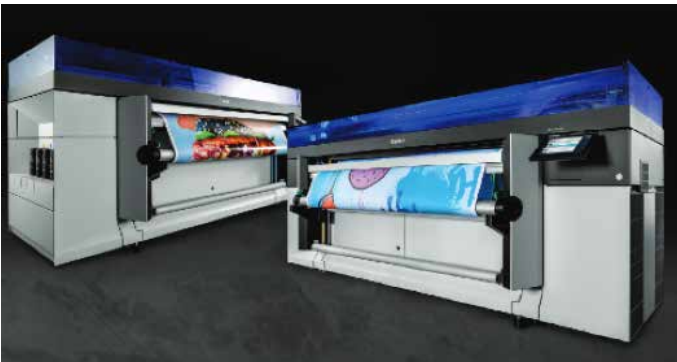

INNOVATIVE
Digital Systems

Check out the super fast, super cool bottle printer in Innovative Digital Systems' line of custom equipment. The Revolution 360° T is a UV-LED curable inkjet printer that is engineered specifically for direct printing on cylindrical flat wall objects as well as tapered/conical objects, such as water bottles. This printer is equipped with a highly efficient UV-LED curing system and high speed printheads capable of printing Primer + W + CMYK + Varnish (clear coat). The printer can perfectly produce consistent registered images with a resolution up to 1200 x 900 dpi. With the simplified workflow and ease of operation, the Revolution 360° T increases your short-run productivity and print personalization capabilities.

We now have demo machines in our Orlando, Florida and Laurel, Maryland locations-- email or call to set up a sneak peek- info@tyrrelltech.com or 888-865-0300. Even for those of us who have been in this industry forever and seen lots of printers print-- this is pretty spectacular to watch!

Canon Colorado UV Gel Printers

The Colorado 1650 with FLXfinish+ technology allows print providers to be more productive and cost-effective with their large format roll printing applications. Produce more output in less time at a lower cost through innovative Canon UVgel technology. Colorado owners enjoy these benefits:

- * Extremely low ink usage
- * Unattended production enables significant labor savings
- * Produce more in less time without sacrificing quality
- * One machine, two finishes- without needing to change ink or media
- * Reduce rework/overwork with highly accurate color
- * High production, all-in solution
- * Flexible UVgel 460 inks
- * Higher Speed, lower running cost
- * Jumbo Roll & Wallpaper Factory Capabilities

Call TyrrellTech to learn more about these printers and this high production, high quality printing series. See a demo today. Call 888-865-0300 or email info@tyrrelltech.com

NEW FROM ROLAND! Introducing Roland's New Resin Printer and Roland UV Printer/Cutters

We have come to expect nothing but the best from Roland's lineup of TrueVIS devices – outstanding image quality, amazing color, and unmatched performance, reliability, and ease of use. Now, with Roland's newly expanded TrueVIS family, there's a TrueVIS that's perfectly suited to their specific applications and requirements. Joining the popular VG3 and SG3 series Eco-Sol printer/cutters within the TrueVIS family are new LG and MG UV printer/cutters and the new AP-640 Resin printer – state-of-the-art inkjets offering the combined versatility, productivity, and stunning graphic results that only a TrueVIS can deliver.

TrueVIS LG Series UV Printer/Cutters

Professional-level UV-LED printer/cutters available in 30", 54" and 64" widths offering the highest image quality, outstanding print speeds/productivity, and unmatched ease of use. With an unbeatable for a wide range of applications, including labels/decals, packaging, window graphics, backlit displays, and more. Fast-drying, wide-gamut UV inks available in CMYK, Orange and Red, plus White and Gloss inks for special effects. VersaWorks RIP and Roland DG Connect and take-up unit are all included with this machine.

TrueVIS MG Series UV Printer/Cutters

Value-packed 30" and 64" UV-LED printer/cutters offering TrueVIS performance and reliability with fast-drying, wide-gamut UV inks available in CMYK, Orange and Red, plus White and Gloss inks. These printers are ideal for a range of applications, such as labels/decals, packaging, backlit displays, and more. VersaWorks RIP and Roland DG Connect and take-up unit are all included with this machine.

The all new TrueVIS AP-640 Resin Printer

Roland's first 64" Resin print-only inkjet offering TrueVIS performance and reliability. Together with specially formulated, cost-effective resin inks produces vibrant, detailed output. Environmentally conscious, GREENGUARD Gold Certified, and low VOC emissions. Perfect for producing wall décor, indoor signs, and retail displays as well as banners, and posters. VersaWorks RIP and Roland DG Connect and take-up unit are all included with this machine.

MIMAKI UV FLATBED PRINTING

Choosing the UV Printer with the Right Fit...

Mimaki's UJF Series of UV flatbed printers is awesome- in a class all its own. Each of these models is a versatile UV printing machine with direct printing capabilities to create unique graphics products and demonstrate outstanding reliability across a wide range of applications.

Business Cards • Novelty Items • Nameplates • Pens • Badges • Greeting Cards • Flash Drives • Custom Art Prints • Durable Signage • Photos on Glass • Awards • Packaging • Membrane Switches • Bottles and other Cylindrical Objects • Photo albums • Print Directly to Wood, Metal, Plastic, and more

Here is a closer look at the UJF-3042 MkII e, UJF 6042 mKII e, and UJF 7151 Plus II UV printers.

UJF-3042 MkII e

Desktop Size UV LED Flatbed Printer
\$3,000 instant rebate, expires 2/24/23

This desktop sized printer enables you to create stunning applications without taking up valuable space. Expect a more stable, faster printing process and access to all of the benefits if its larger counterparts. When your space is limited, your ideas don't have to be.

UJF-6042 MkII e

\$5,500 instant rebate, expires 2/24/23
High performance, state-of-the-art, small format LED UV

The UJF-6042 model features improved image quality and a more robust base for better stability while printing. Equipped with Mimaki's core technologies, you can expect precise ink dot placement and unparalleled image quality. Create original prints without limits.

UJF-7151 plus II

Next-generation direct-to-object flatbed LED UV printer
\$7,500 instant rebate, expires 2/24/23

The UJF-7151 achieves print speeds up to 190% faster than the previous model and features 8 print heads, enabling configurations that suit any application. The 8 ink slots can be configured for a standard 4 color setup or expanded to include light cyan, light magenta, white, clear and primer. Enjoy industrial capabilities in a small form factor.

TyrrellTech's Coryn Joke of the Month-
The Punch Line...

Because it's two tired.

ENGRAVER CORNER

Kern Laser's Optiflex

The Optiflex is Kern's Flagship High Performance Laser System

If your shop requires a large-format laser solution, the OptiFlex could be your next machine of choice.

The HyperDual motion package debuts on the OptiFlex and is setting the standard for large format laser cutting and engraving across the world. This improved motion system features a rack and pinion design and powerful servo motors at each side of the laser table. Cut acceleration rates are up to three times faster with a 100% increase in top end vector speed. The X axis has also been upgraded with twin linear rails and a thicker steel reinforced belt.

Standard features included with the OptiFlex laser system are a water chilling unit, vacuum blower package, computer/monitor package and design software.

Forget all of that technical stuff, though-- this is a super way cool large format laser that can really and truly do it all. Whether you are a sign shop, metal fabricator or educational institute the OptiFlex laser system should be your machine of choice! Check out the demo unit in our Laurel, Maryland office today!

If you visit our Pompano Beach, Florida office, you just might meet our Guard...Dog? I mean, we do things different in Florida, right!?
