BEYOND PRINTING...

Worktables Make Mounting & Laminating Easy!

Cutworx Mounting Tables are not only a workspace (what shop doesn't need more functional table space?!), but also a mounting table with a dense foam roller. This table is the perfect tool for mounting signs to board and for prepping cut and weed-ed graphics with transfer tape.

If you have been in this industry for long enough, you have mounted signs with a laminator and you know how well it can work. A laminator is a great tool for that. What a table offers over and above the laminator—if you have the space to accommodate it—is the ability to keep your board fixed and minimize movement as you mount it—making sure that the decal lands in the perfect spot.

These CWT tables are some of the best on the market—and they have some show special pricing until the end of September!

CWT 1016 - 64.5" x 39" - Save \$1,980

CWT 1428 - 9'4" x 57" - Save \$2,220

CWT 1630 Regular - 9'10" x 5'3" - Save \$2,760

CWT 1630 Premium - 9'10" x 5'3" - Save \$3,138

CWT 1640 Regular - 13'1" x 5'3" - Save \$3,270

CWT 1640 Premium - 13'1" x 5'3" - Save \$3,585

CWT 2147 Premium - 15'5" x 6'11" - Save \$5,145

Let us show you why we love them and what they cost! Call 888-865-0300 or email info@tyrrelltech.com.

**Promo prices expire September 29, 2023*

TYRRELLTECH TRAINING

RSVP to info@tyrrelltech.com with the date, class topic and location where you plan to attend-- these are all IN PERSON, live classes and we cannot wait to see you once you save your spot!

TyrrellTech
Digital Printing Systems

Training Tuesdays

IN PERSON MUST RSVP
FREE Classes
limited to 8 people

Laser Maintenance- Keeping Your Laser Clean & Productive
Keep your laser engraver clean and running at an optimal level- get great quality and great output. Learn how... A clean laser is a happy laser!
Tuesday, September 12, 10 am - 12 pm

Digital Media 101
Walk through the variety of media available for a digital printer. Find how one machine can get you into stickers, wallpaper, backlit, banners & more.
Tuesday, September 19, 10:00 am - 12 pm

Adobe Illustrator Basics
Adobe Illustrator is a powerful tool in this industry. Spend time learning some basic navigation of the software to give you an introduction to Adobe.
Tuesday, September 26, 10 am - 12 pm

Color Management & Printer Maintenance
How does the computer make color, how is it interpreted, and what happens between file creation and print to manage color expectations?
Tuesday, October 3, 10 am - 12 pm

Roland Versaworks Basics
Take a refresher course in Versaworks; Getting started, selecting profiles and setting up your print job.
Tuesday, October 10, 10 am - 12 pm

Apparel & Heat Transfer
Learn more about both the CAD cut options for heat transfer materials and the possibilities of print & cut solutions in this apparel-focused class
Tuesday, October 17, 10 am - 12 pm

Flexi Sign Basics
Learn more about the sign industry's most intuitive and effective sign design software to increase productivity and efficiency in your print shop.
Tuesday, October 24, 10:00 am - 12 pm

Adobe Illustrator 101
Adobe Illustrator is a powerful tool in this industry. Spend time learning some basic navigation of the software to give you an introduction to Adobe.
Tuesday, November 7, 10 am - 12 pm

You MUST RSVP - Seats are Limited! 888-865-0300 or info@tyrrelltech.com

Training currently at these locations:

9045 Maier Road, Suite A, Laurel, MD 20723
200 Route 31 North, Suite 109, Flemington, NJ 08922
2400 W. Copans Road, Unit 8, Pompano Beach, FL 33069

HEAT TRANSFER & APPAREL CORNER...

Geo Knight Twin Shuttle Heat Press

Good News!

Finally, after quite some time and endless requests, George Knight now has a Fully Threadable, Twin-Station, 16x20 Air-Automatic press!

Introducing the extremely heavy duty DK20SPT TWIN 16x20 Air-Automatic shuttle press:

The DK20SPT accepts ALL of the same universal All-Thread interchangeable tables as the manual & automatic swing-away and clamshell presses, and uses the exact same cylinder, mechanics, and electronics as the proven robust "un-breakable" DK20SP.

The price is excellent, at only \$4950 – it is like getting (2) DK20SP presses for \$1000 less!

Call 888-865-0300 or email info@tyrrelltech.com to learn more!

Siser's Romeo & Juliet Cutters

Searching for the perfect cutter that will take your business to the next level? Look no further than Romeo & Juliet! These professional level, high-definition cutters come in 24" & 12" widths and are easy to use! Fine detail and full-length cuts are no problem. Equipped with high-quality blades and features that are reminiscent of large-format cutters, these cutters lead the way in professional projects. The sleek touch screen includes Siser specific presets along with the ability to utilize the built-in registration camera, so you can print and cut with precision and accuracy. Paired with Leonardo Design Studio, Romeo & Juliet have the power to craft possibilities into reality. Never was there a cutter more pro,

than that of our trusted Romeo! Call 888-865-0300 or email info@tyrrelltech.com.

DIRECT TO FILM PRINTING

Mimaki's New Direct to Film Solution

TxF150-75 is a reliable, high-quality printer that incorporates Mimaki's technologies based on the concept of "safety and stability". The DTF printer is designed with a focus on stable quality, incorporating functions to prevent "ink ejection failure" and "white ink clogging," which

have been major issues for DTF printers. This printer is equipped with the newest version of MCT (Mimaki Circulation Technology) that controls sedimentation by constantly circulating the white ink.

Cleaning is automatically performed to recover if a nozzle is missing with our NCU (nozzle check unit) and this printer has NRS (Nozzle Recovery System) for uninterrupted printing. This printer runs with thermal transfer pigment ink PHT50, which is ECO PASSPORT certified.

Roland's BN-20D Direct-to-Film Printer

The new VersaSTUDIO BN-20D Direct-to-Film System is designed to meet the growing demand for DTF apparel decoration with a solution that offers superior overall performance and legendary Roland DG reliability. The BN-20D Direct-to-Film System makes it easy for users to customize T-shirts and other fabric goods with vibrant, detailed graphics and text in just four easy steps, with no weeding required. In addition to the BN-20D printer, which offers many of the most popular features of Roland DG's best-selling BN-20 series desktop devices, Roland DGA also offers the ink, powder and film needed to produce DTF graphics (each sold separately).

HOT YEAR END SALES FROM ROLAND!

Save BIG on a BIG Printers...

Starting September 1, 2023, through December 29, 2023, end-users who purchase a Roland DG IU-1000F UV Flatbed Printer will receive a \$10,000 Instant Rebate (which positions pricing at \$89,995 Promo MSRP), plus FREE installation and training (a \$4,995 MSRP value!). NEW FROM CANON!

Canon Colorado UV Gel Printers- The M Series Gives You "White Ink Without Worry"

Are you ready for next level productivity and creativity? With the NEW Colorado M-series printer, you can say 'yes' to more jobs, create stunning applications and reduce turnaround times. The Canon Colorado M-series' modular architecture allows it to grow with your business and is designed for low cost of ownership. And now, you can add white to your production process...

- * The Power of UVgel Technology – create robust, fade, and scratch-resistant prints with excellent print quality.
- * White Ink Without Worry – our NEW UVgel white ink developed just for the Colorado M-series printer, now brings you a next-level white ink that reduces the hassles associated with white ink.
- * FLXfinish+ – print matte, gloss or mixed matte and gloss in one print, without varnish, or an additional printhead.
- * Impressive Media Range – "WOW" your customers with an extended media range, including textured, transparent, colored, reflective, magnetic, heat sensitive media, and many more!
- * Modular Design | Industrial Quality: Configure your own ideal Colorado M-series printer to your current business needs and easily upgrade features, speed, and inline finishing as your business grows.

Call TyrrellTech to learn more about these printers and this high production, high quality printing series. See a demo today. Call 888-865-0300 or email info@tyrrelltech.com.

DTF Shaker Solution From Mimaki

When it comes to DTF, it is not as simple as just printing onto the film. Once the print goes onto film, it then needs to have a powder adhesive added to it and heat cured onto the surface of the ink. After that is cured, the back of the adhesive has what is called an orange peel surface-- that then allows the graphic to be applied to fabric.

So... what is the best way to get that adhesive powder onto the print? There are manual ways and lots of options, but this shaker from Mimaki, to pair with their new DTF printer, is a pretty awesome solution. Available in 24" and 31"-- keep watching-- more to come!!

ENGRAVER CORNER

Universal Laser's
ULTRA X6000

UNIVERSAL
LASER SYSTEMS

The ULTRA X6000 from Universal Laser has unmatched capability, exceptional controllability, and highest performance

The ULTRA X6000 is a high-accuracy laser material processing system designed for demanding applications in manufacturing, prototyping, and research and development environments. It offers an extensive set of advanced features and capabilities to achieve impeccable quality on the broadest range of materials.

The most unique features include patented MultiWave Hybrid™ technology and laser power optimization that enable accurate matching of available laser energy with material absorption characteristics to produce optimal results. Additionally, an integrated and ever-expanding database of material processing parameters dramatically simplifies setup and use of the system.

This laser can perform operations such as high-speed cutting, marking, engraving, surface modification, and many others – sequentially or simultaneously.

Whether laser processing a specific material or a range of diverse applications, the modular design of the ULTRA X6000 laser system allows for the highest versatility to address varying requirements.

Call 888-865-0300 today and ask for your local Laser Champion to learn more!

TyrrellTech's Corny Joke of the Month-
The Punch Line... **A hesi-tater**

Printing On Mugs, Cups & Glasses?!

INNOVATIVE
Digital Systems

Check out the super fast, super cool bottle printer in Innovative Digital Systems' line of custom equipment. The Revolution 360° T is a UV-LED curable inkjet printer that is engineered specifically for direct printing on cylindrical flat wall objects as well as tapered/conical objects, such as water bottles. This printer is equipped with a highly efficient UV-LED curing system and high speed printheads capable of printing Primer + W + CMYK + Varnish (clear coat). The printer can perfectly produce consistent registered images with a resolution up to 1200 x 900 dpi. With the simplified workflow and ease of operation, the Revolution 360° T increases your short-run productivity and print personalization capabilities.

We now have a demo machine in our Orlando, Florida location-- email or call to set up a sneak peek- info@tyrrelltech.com or 888-865-0300. Even for those of us who have been in this industry forever and seen lots of printers print-- this is pretty spectacular to watch!

And, if this isn't enough, check out the new TwinRev 360 and QuadRev 360 Solutions-- increase productivity with multiple cups printed at once!
