CANON UV PRINTING SOLUTIONS

Canon Colorado M Series UV Gel Printers

Take productivity to another level with this smart investment-- The Colorado M-series 1.6m roll-to-roll printer offers true productivity at exceptional quality and a spectacular application range. Now including hassle-free white ink that is up to 3 times faster than comparable technologies. Also designed for a low total cost of ownership: with low ink and energy use and low media waste. And, best of all, easy field upgrades to allow it to scale with your business.

Canon Arizona UV Flatbed Printers

Arizona large format flatbed printers offer unsurpassed versatility. Each Arizona digital printer is built using a true flatbed architecture

with a vacuum system to hold the media stationary on a flat surface, assuring accurate registration even on multiple imaging passes. Most Arizona UV

flatbed machines also offer a roll-to-roll media option. This means that with one printer, you can print on almost any rigid or flexible substrate. Call to find out the model and size that best suits your needs and helps to grow your business!

APPAREL GRAPHICS

Mimaki's TxF150 & TxF 300 Direct to Film Printing Solutions

TxF150-75 is a reliable, high-quality printer that incorporates Mimaki's technologies based on the concept of "safety and stability". The DTF printer is designed with a focus on stable quality, incorporating functions to prevent "ink ejection failure" and "white ink clogging," which have been major issues for DTF printers. This printer is equipped with the newest version of MCT (Mimaki Circulation Technology) that controls sedimentation by constantly circulating the white ink.

And now... The new TxF300-75 has been shown to increase productivity by 300% compared to the existing model, further setting Mimaki apart as a leader in textile and apparel printing solutions. Embodying the same core functionalities as the TxF150-75, the TxF300-75 promises safe and stable operation while increasing productivity.

Call TyrrellTech to see one in person!

Lineup of two models in series with different productivity

Pro-model and Entry-model - 2 models are available for customers to choose according to the productivity and investment amount.

*Print condition: H 280 mm x W 360 mm print graphics are printed on W 800 mm DTF film side by side

	Pro-model TxF300-75	Large T-shirts 66 pcs/h Production mode 720*720 6P F.5 ml/h
	Entry-model TxF150-75	Large T-shirts 22 pcs/h Production mode 720*720 3P 2.6 ml/h

Heat Transfer Print/Cut and Cut Vinyl for Apparel

Siser's digital media offerings are the easiest way to achieve full color graphics on your garments! Compatible with eco-solvent, solvent and latex inks, these materials come in various widths and versions to work with your printer/cutter. Digital heat transfer media allows you to print vivid designs and detail that can't be achieved with regular cut vinyl media.

Don't worry- if you don't have a printer, you can still get into the apparel game with standard HTV color products. Siser has a huge range of colorful and patterned HTV products that allow you to decorate garments in a flash... colorful, layerable, and awesome. Check out all of their products at www.siserna.com, and you can get them at any TyrrellTech location!

Mimaki JFX200 EX UV Flatbed Printer

New UCJV330 UV Printer/Cutter from Mimaki

When it comes to UV printing- flatbed or rollfed- TyrrellTech has been placing the Mimaki printers for a long time. As we often tell customers, we love love love to sell and support machines that work when you need them, and that stand the test of time.

The Mimaki UV flatbed JFX200 EX printer is just that. Do we have to do service calls on them? Yes, we do. Do they sometimes give us and customers a fit? You better believe it. But truly, Mimaki has a well engineered UV flatbed printer that is on the market at a great price and that has a great reputation for reliability and performance.

To add to the UV line up, the new UCJV330-160 integrated printer/cutter offers extremely versatile UV-LED roll-to-roll inkjet printing with significantly improved productivity and image quality for sign graphics applications. With production speeds of 301 sqft/hr for a four-color configuration or 194 sqft/hr with White and/or Clear inks, the UCJV330-160 enables users to provide their customers with impressive turnaround times and produce more jobs with increased efficiency. Need print/cut stickers with white in the background but on a clear vinyl? This printer is the way to go!

Check them out-- contact TyrrellTech to set up a live or virtual demo. Call 888-865-0300 or email info@tyrrellech.com.

Cutworx Mounting & Laminating Tables

"I can mount prints just fine with a laminator. I don't need that table." Yeah, we said the same thing... and we were just as wrong. Check out the CWT worktables-- they make sign work easier. Work smarter, not harder!

ENGRAVER CORNER

UNIVERSAL
LASER SYSTEMS

Universal Lasers for the WIN!

The machines from Universal Laser Systems offer a range of bed sizes and laser wattages to suit all of your marking and engraving needs. From small to big, they really cover it all.

The ULS VLS475-

The VLS4.75 is a free-standing platform with a materials processing area of 24 x 18 in (610 x 475 mm). It offers laser power from 10 to 75 watts 10.6 μm or 30, 50 or 75 watts 9.3 μm .

The ULS VLS675-

The VLS6.75 is a free-standing platform with a material processing area of 32 x 18 in (813 x 475 mm). It offers laser power from 10 to 75 watts 10.6 μm or 30, 50 or 75 watts 9.3 μm .

The ULS PLS6.150D-

The PLS6.150D laser system is a free-standing platform offering a 32 x 18 in (813 x 457 mm) material processing area and laser power up to 150 watts with dual 10.6 μm CO2 lasers. 30, 50, and 75 watt 9.3 μm lasers are also available.

The PLS6.150D is available with optional patented SuperSpeed™ technology using a dual laser configuration, pulsing the beams independently, making it possible for 2 lines of raster image to be engraved or marked simultaneously. This enables laser marking

and engraving in half the time and vector cutting with higher power.

The ULS Ultra R5000-

Material processing area of 32 x 24 in. that supports material thickness up to 12 in. Maximum power configuration is 150 watts CO2 and 50 watts fiber. Supports two lasers - up to (2) CO2 laser sources (10-75 watts) or up to (1) CO2 laser source (10-150 watts) and up to (1) permanently mounted fiber laser source

The ULS Ultra R9000-

Material processing area of 48 x 24 in. that supports material thickness up to 12 in. Maximum power configuration is 300 watts CO2 or 150 watts CO2 and 50 watts fiber in a multiple wavelength configuration. Supports two lasers - up to (2) CO2 laser sources (10-150 watts) or up to (1) CO2 laser source (10-150 watts) and (1) permanently mounted fiber laser source

TyrrellTech's Corny Punchline of the Month-
There's a spring in people's steps!

Printing On Mugs, Cups & Glasses?!

INNOVATIVE
Digital Systems

Check out the super fast, super cool bottle printer in Innovative Digital Systems' line of custom equipment. The Revolution 360° T is a UV-LED curable inkjet printer that is engineered specifically for direct printing on cylindrical flat wall objects as well as tapered/conical objects, such as water bottles. This printer is equipped with a highly efficient UV-LED curing system and high speed printheads capable of printing Primer + W + CMYK + Varnish (clear coat). The printer can perfectly produce consistent registered images with a resolution up to 1200 x 900 dpi. With the simplified workflow and ease of operation, the Revolution 360° T increases your short-run productivity and print personalization capabilities. We now have a demo machine in our Orlando, Florida location-- email or call to set up a sneak peek- info@tyrrelltech.com or 888-865-0300.

And, if this isn't enough, check out the new TwinRev 360 and QuadRev 360 Solutions-- increase productivity with multiple cups printed at once!

The QuadRev 360 UV rotary printer is specifically engineered for high-speed direct-to-object printing on cups, bottles, and tumblers that are metal, glass, or plastic. Most importantly, operators enjoys simultaneous dual object printing and 2x2 shuttling stations. With that, the QuadRev 360° dramatically improves print efficiency with continuous printing and during print load and unload with a single operator.

Let's celebrate the ONLY TyrrellTech
April Birthday that we have...
