# COOL STUFF- CHECK IT OUT!

**Siser** Compostable Heat Transfer  
CAD Cut Vinyl!

Siser®'s push for sustainability continues with the new PureHT™—the world's first compostable heat transfer material!

Specially formulated with the Earth in mind, PureHT will biodegrade over time when in a composting environment, leaving behind no harmful residue. PureHT is certified compostable by the BPI (Biodegradable Products Institute) and is found to be compliant with specifications established by the American Society for Testing and Materials standard ASTM D6400.

PureHT also features the same thinness as EasyWeed®, a lower application temperature of 275°F/135°C, and layerability with select other Siser products.

We'll be launching PureHT in 9 earthy colors: Black, White, Ultramarine Blue, Paprika Red, Moss Green, Amber Yellow, Autumn Orange, Russet Brown, and Stone Gray.

## Cutting & Finishing Solutions from Keencut

Here at TyrrellTech, we offer the complete solutions-- machine, consumables, finishing... but sometimes we forget to talk about all of the pieces. We firmly believe in educating our customers, so, we would like to tell you more about the Keencut brand of cutters that we sell!

Keencut uses superior manufacturing quality to create safe, accurate and simple-to-use cutting equipment for specialist users in the sign-making, wide format printing, and picture framing industries. Keencut makes reliable cutters, stating a specific accuracy level for every machine and offering a comprehensive 5-year guarantee.

With a continuous design and development program, innovative use of premium quality materials, and the expertise of Keencut engineers, Keencut is proud to claim that their products are recommended by professionals across the world as the safest, most accurate and easiest to use manual cutting machines.

Call or email to learn more about the stand up Steeltrak and Excalibur solutions for cutting rigid substrates. Or, check out the Evolution cutter that can be mounted to a table or used stand alone for cutting flexible and thin rigid substrates. They truly have a solution for all kinds of cutting- check it out on our website, [www.tyrrelltech.com](http://www.tyrrelltech.com), under Equipment --> Cutters.

## THE DIRECT TO FILM TRAIN...

### Mimaki's TXF150 & TXF 300 Direct to Film Printing Solutions

TxF150-75 is a reliable, high-quality printer that incorporates Mimaki's technologies based on the concept of "safety and stability". The DTF printer is designed with a focus on stable quality, incorporating functions to prevent

"ink ejection failure" and "white ink clogging," which have been major issues for DTF printers. This printer is equipped with the newest version of MCT (Mimaki Circulation Technology) that controls sedimentation by constantly circulating the white ink.

And now... The new TxF300-75 has been shown to increase productivity by 300% compared to the existing model, further setting Mimaki apart as a leader in textile and apparel printing solutions. Embodying the same core functionalities as the TxF150-75, the TxF300-75 promises safe and stable operation while increasing productivity. Call TyrrellTech to see one in person!

#### Lineup of two models in series with different productivity

Pro-model and Entry-model - 2 models are available for customers to choose according to the productivity and investment amount.

\*Print condition: H 200 mm x W 360 mm print graphics are printed on W 800 mm DTF film side by side

	Pro-model <b>TxF300-75</b>		Large T-shirts 66 pcs/h Production mode 720*720 6P 7.5 ml/h
	Entry-model <b>TxF150-75</b>		Large T-shirts 22 pcs/h Production mode 720*720 10P 2.6 ml/h

## Summer Savings from Mimaki on DTF!

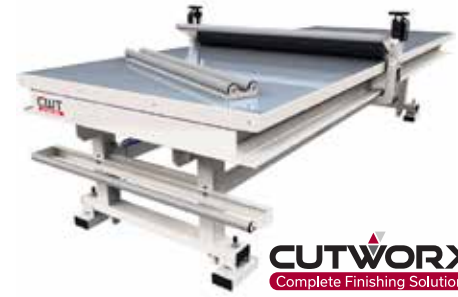

**Direct to Film Printing.**  
**TyrrellTech Can Take You There.**

**Save \$3000 on Mimaki TXF150.**  
Call 888-865-0300 or email [info@tyrrelltech.com](mailto:info@tyrrelltech.com) to learn more!  
Expires 9/27/2024

**Mimaki**  
**TyrrellTech**  
Digital Printing Systems

## Cutworx Mounting & Laminating Tables

"I can mount prints just fine with a laminator. I don't need that table." Yeah, we said the same thing... and we were just as wrong. Check out the CWT worktables-- they make sign work easier.

**CUTWORX**  
Complete Finishing Solutions

Work smarter, not harder! CWT Flatbed Applicators provide a fully controlled lamination process with a minimum of physical labor-- no more need for squeegees, handheld rollers or soap water. Call 888-865-0300 or email [info@tyrrelltech.com](mailto:info@tyrrelltech.com) to learn more!

## Mimaki JFX200 EX UV Flatbed Printer

## New UCJV330 UV Printer/Cutter from Mimaki

When it comes to UV printing- flatbed or rollfed- TyrrellTech has been placing the Mimaki printers for a long time. As we often tell customers, we love love love to sell and support machines that work when you need them, and that stand the test of time.

The Mimaki UV flatbed JFX200 EX printer is just that. Do we have to do service calls on them? Yes, we do. Do they sometimes give us and customers a fit? You better believe it. But truly, Mimaki has a well engineered UV flatbed printer that is on the market at a great price and that has a great reputation for reliability and performance.

To add to the UV line up, the new UCJV330-160 integrated printer/cutter offers extremely versatile UV-LED roll-to-roll inkjet printing with significantly improved productivity and image quality for sign graphics applications. With production speeds of 301 sqft/hr for a four-color configuration or 194 sqft/hr with White and/or Clear inks, the UCJV330-160 enables users to provide their customers with impressive turnaround times and produce more jobs with increased efficiency. Need print/cut stickers with white in the background but on a clear vinyl? This printer is the way to go!

Check them out-- contact TyrrellTech to set up a live or virtual demo. Call 888-865-0300 or email [info@tyrrelltech.com](mailto:info@tyrrelltech.com).

# ENGRAVER CORNER

## Introducing Gravotech!

Are you a craftsman or retailer who wants to add unique personalized engraving on your products? The question is: which technology should you choose? Mechanical engraving machine or laser - which is the best solution for your business?
