All New VLS3.60ES From **UNIVERSAL** LASER SYSTEMS

Something new is coming from Universal Laser System this fall... they are revamping their VersaLaser model and you are going to be excited to see what's next.

This new VLS3.60ES Engraving System hangs

its hat on having both ease of operation AND robust capabilities.

The VLS3.60ES has a new control software - Laser System Manager (LSM). It also has a Camera Vision System and does direct import of common graphics file formats (PDF, DXF, BMP, JPG, Tiff, PNG, SVG and G-Code). This ULS VLS model supports numerous graphics packages, including Corel, Adobe, Inkscape, AutoCAD, and more.

No other compact laser system on the market provides this level of safety. safety features include E-Stop, Patented Fire Suppression option, Shatter resistant laminated Safety Glass, All metal enclosure

with labyrinth seals, Air Cooled, Low Voltage, Metal Laser, Redundant Safety Interlocks, Over-Temperature Alarm(s) and User access login controls.

The top Door Camera, Fire Suppression support and New X-axis cover are now standard on every system. This is an exciting new addition to the ULS line up!

SEE THAT SPARKLE...

We're excited to announce the addition the dazzling NEW General Formulations 767 Sparkle Holographic film. The eye-catching 6.0 mil / 150 mic vinyl film features a clear permanent adhesive and colorful sparkle effect that changes with light and promises to add a whole new dimension of color to graphics.

The new GF 767 Sparkle Holographic Film will officially launch at Printing United in Las Vegas, September 10-12.

GF 767 Sparkle Holographic is a printable media designed to make any graphic stand out. Instantly enhance any product or surface the film is applied to with its rainbow iridescence and sparkling glitter texture that changes with light and perspective. The durable 6.0 mil thick film makes for easy application and is coated with a permanent acrylic pressure-sensitive adhesive. It works great for decals, point-of-purchase, retail displays, packaging, and holiday graphics. The film accepts a variety of solvent-based, eco-solvent, latex, and UV curable inks common to wide format digital printing systems.

Pricing coming soon- call to learn more- 888-865-0300!

COOL STUFF- CHECK IT OUT!

Cutting & Finishing Solutions from Keencut

Here at TyrrellTech, we offer the complete solutions-- machine, consumables, finishing... but sometimes we forget to talk about all of the pieces. We firmly believe in educating our customers, so, we would like to tell you more about the Keencut brand of cutters that we sell!

Keencut uses superior manufacturing quality to create safe, accurate and simple-to-use cutting equipment for specialist users in the sign-making, wide format printing, and picture framing industries. Keencut makes reliable cutters, stating a specific accuracy level for every machine and offering a comprehensive 5-year guarantee.

With a continuous design and development program, innovative use of premium quality materials, and the expertise of Keencut engineers, Keencut is proud to claim that their products are recommended by professionals across the world as the safest, most accurate and easiest to use manual cutting machines.

Call or email to learn more about the stand up Steeltrak and Excalibur solutions for cutting rigid substrates. Or, check out the Evolution cutter that can be mounted to a table or used stand alone for cutting flexible and thin rigid substrates. They truly have a solution for all kinds of cutting- check it out on our website, www.tyrrelltech.com, under Equipment --> Cutters.

Siser Compostable Heat Transfer CAD Cut Vinyl!

Siser®'s push for sustainability continues with the new PureHT™— the world's first compostable heat transfer material!

Specially formulated with the Earth in mind, PureHT will biodegrade over time when in a composting environment, leaving behind no harmful residue. PureHT is certified compostable by the BPI (Biodegradable Products Institute) and is found to be compliant with specifications established by the American Society for Testing and Materials standard ASTM D6400.

PureHT also features the same thinness as EasyWeed®, a lower application temperature of 275°F/135°C, and layerability with select other Siser products.

We'll be launching PureHT in 9 earthy colors: Black, White, Ultramarine Blue, Paprika Red, Moss Green, Amber Yellow, Autumn Orange, Russet Brown, and Stone Gray.

THE DIRECT TO FILM TRAIN...

Mimaki's TxF150 & TxF 300 Direct to Film Printing Solutions

TxF150-75 is a reliable, high-quality printer that incorporates Mimaki's technologies based on the concept of "safety and stability". The DTF printer is designed with a focus on stable quality, incorporating functions to prevent

"ink ejection failure" and "white ink clogging," which have been major issues for DTF printers. This printer is equipped with the newest version of MCT (Mimaki Circulation Technology) that controls sedimentation by constantly circulating the white ink.

And now... The new TxF300-75 has been shown to increase productivity by 300% compared to the existing model, further setting Mimaki apart as a leader in textile and apparel printing solutions. Embodying the same core functionalities as the TxF150-75, the TxF300-75 promises safe and stable operation while increasing productivity. Call TyrrellTech to see one in person!

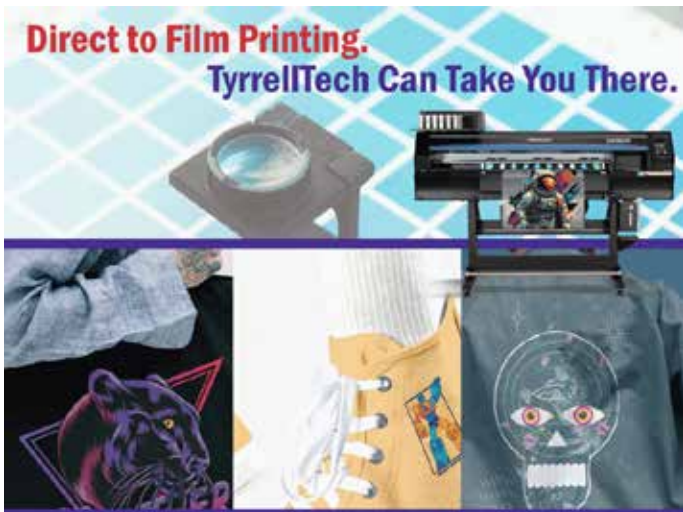

Lineup of two models in series with different productivity

Pro-model and Entry-model - 2 models are available for customers to choose according to the productivity and investment amount.

*Print condition: H 280 mm x W 350 mm print graphics are printed on W 800 mm DTF film side by side

	Pro-model TxF300-75		Large T-shirts 66 pcs/h Production mode 720x720 6P 7.5 ml/h
	Entry-model TxF150-75		Large T-shirts 22 pcs/h Production mode 720x720 10P 2.6 ml/h

Graphtec's New CE8000 Series

Introducing the NEW Graphtec CE8000 Series, the go-to solution for boosting production efficiency for Signage and Vinyl Graphics, DTF Apparel, PRINT & CUT, POP & Packaging, Automotive Markets, and more.

Compared to its predecessor, the CE7000, the CE8000 boasts Enhanced Rigidity for better feeding and cutting performance.

New Wireless LAN capability adds convenience and flexibility, allowing seamless connectivity in various work settings. Plus, it's equipped with the reliable Registration Mark Sensing System (ARMS) carried over from the CE7000 for precise operation.

Supercharge your Production Capabilities with the Graphtec CE8000 Series The Perfect Solution for Streamlined Workflows with Exceptional Results. Call to learn more- 888-865-0300!

ENGRAVER CORNER

Gravotech Has Got You Covered!

Why a laser engraver? The applications are many, but so often in today's marketplace, customization and personalization top the list of reasons why people seek out a laser engraver. Personalization machines are numerous and varied, so you're bound to find one that suits your business. Gravotech customers include:

- Artisan boutiques
- Jewelry stores
- Start-up businesses
- Online sales sites
- Pop-up stores
- Events... and more!

To identify the engraving machine best suited to your personalized engraving applications, you need to ask yourself a few key questions, including:

- What types of materials do you want to engrave?
- Do you need to engrave one-offs or in series?
- What is your purchasing budget?
- How much space is available in your shop?
- What are customers asking you to do?

Once you know the answers to those questions... then what? That's where we can help! TyrrellTech can help figure out the production machine that suits your needs- Nobody Makes It Easier! Just call us at 888-865-0300 or email info@tyrrelltech.com- we have got you covered!

The ULS Ultra X6000

UNIVERSAL
LASER SYSTEMS

Looking for a laser engraver with unmatched capability, exceptional controllability, and highest performance? Here it is...

The ULTRA X6000 is a high-accuracy laser material processing system designed for demanding applications in manufacturing, prototyping, and research and development environments. It offers an extensive set of advanced features and capabilities to achieve impeccable quality on the broadest range of materials.

The most unique features include patented MultiWave Hybrid™ technology and laser power optimization that enable accurate matching of available laser energy with material absorption characteristics to produce optimal results.

Additionally, an integrated and ever-expanding database of

material processing parameters dramatically simplifies setup and use of the system.

Perform operations such as high-speed cutting, marking, engraving, surface modification, and many others – sequentially or simultaneously.

Whether laser processing a specific material or a range of diverse applications, the modular design of the ULTRA X6000 laser system allows for the highest versatility to address varying requirements.

Call 888-865-0300 today and ask for your local Laser Champion to learn more!

Top 5 Benefits of Laser Material Processing with an ULTRA X6000

- 1** **Material Flexibility**
process more materials than ever before
- 2** **Accuracy**
measurably better results - when microns matter
- 3** **Quality**
visibly superior results - less or no post processing
- 4** **Repeatability**
highest part/part consistency and yield
- 5** **Productivity**
fast setup and highest throughput

ONLINE CATALOG

Living in a pandemic and post pandemic world made it hard to trust prices would hold for long, so we haven't printed a catalog in a while. But, we have GREAT news! We have an online version of our catalog that you can peruse, and we will be able to keep it more current than the print version. Check it out here!
