PROMOTIONS GALORE

Roland's newest production speed printer/cutter is on sale! Save \$1,000 off of the machine price AND get a free 64" dryer unit add on- all in all, a \$4,024 savings! Expires 9/26/25- Read more on page 3!

Mimaki has brought its industrial UV flatbed printing capabilities to a 4' x 4' bed, made to fit into tighter spaces. This printer has all of the capabilities of its big brother with a slightly smaller footprint. And now through September 26, get a free ionizer (\$2,943 value)

with purchase of this printer. Read more on Page 3.

Roland's small format UV printing line has a new look- the MO series printers. These printers are capable of all varieties of UV printing onto objects, and now, you can get into the MO-240 for a nice new low price...

Now through December 26, save \$5,000 off of the printer purchase. Read more about these MO printers on Page 3.

Mimaki small format UV printing takes the industrial productivity of the larger solution from Mimaki and makes it accessible for smaller spaces and smaller print needs. And these machines can do awesome cylindrical printing. The UJF series is a great workhorse, and now you can get a free kebab (for that cylindrical printing) with the purchase of a UJF-6042MKIIe or a UJF-7151plusII. Now until September 26. More on page 3.

ENGRAVER CORNER

Gravotech LS100EX CO2 Laser Engraver

Check out Gravotech's LS100EX CO2 laser machine- a medium-sized machine for engraving and cutting. Its engraving area matches the size of ¼ sheet, making it the ideal sign making machine. The gantry laser technology applicable for small industrial series production.

With a working area of 12" x 24" exactly matching ¼ sheet size, the LS100EX is a signage engraving and laser cutter above the rest. Be it plastic, wood, metal, or glass, any signage material can be engraved and cut. This can be your favorite sign making machine, with a large range of consumables available with up to 2 color layers, for a contrasted and professional result.

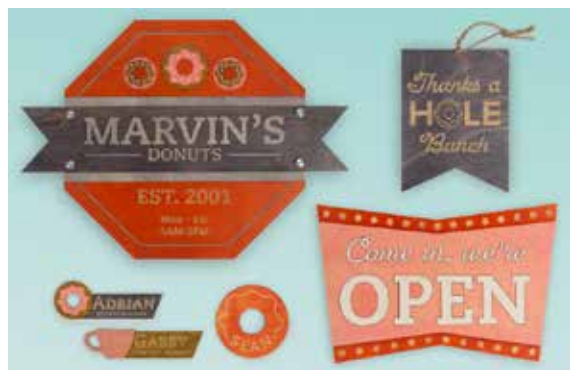

The workspace size combined with a gantry laser technology makes the LS100 EX the perfect CO2 laser machine for small production series. Load your items or parts to be engraved, and create your engraving job with the Gravostyle software. Several industrial functions are available, such as the Matrix mode or automatic date stamp. Let your laser engraver do the hard work!

CO2 and Fiber Laser performance mainly comes from matching the laser source to the material to engrave. A CO2 source will be perfect for plastics and organic materials such as wood, paper, rubber etc. A Fiber laser will be more appropriate for metals. The LS100 EX is available with a CO2 laser source or a Fiber laser source, to match all of your applications.

Call 888-865-0300 or email info@tyrrelltech.com for more info.

ROWMARK HIGHLIGHT CORNER

ColorShop Woods Engraving Material

Available exclusively from Rowmark, this line features all-natural birch stained in vibrant colors that are suitable for laser or rotary engraving or UV-LED printing. Available in 20 unique colors in either 12" x 12" or 12" x 24" sizes, our colorful wood line of products provides a contemporary yet vintage look to any project.

Tons of color combinations are available- call or email to learn more- 888-865-0300, info@tyrrelltech.com

VLS3.60ES- Innovative Desktop from ULS

UNIVERSAL
LASER SYSTEMS

The VLS 3.60ES from Universal Laser Systems is a compact desktop laser system designed for multi-user environments. It has a 24" x 12" material processing area equipped with a door-mounted camera.

It is full of rich features and capabilities that enhance productivity, operational efficiency, usability and safety for operators:

- * Access control and support capabilities for administrators to effectively monitor and manage system use and performance
- Laser System Manager (LSM) control software with a robust set of features, including support for up to 16 colors for assigning different speed and power settings or controlling the order of vector and raster processes
- * Device compatibility with support for a Windows-based PC or other platform like a Macintosh-based PC
- * Design software compatibility with support for a range of common interchange formats such as PDF, DXF, BMP, JPG, Tiff, PNG, SVG and G-Code
- * Supports remote connections across any wired or wireless local network from any device (computer, tablet or phone) using common internet browsing software
- * Safety features and options include emergency E-Stop button and automatic fault detection.
- * Rapidly diagnose and resolve issues or errors with administrator tools that provide advanced diagnostic, reporting and troubleshooting
- * Fire Suppression Assistance Module (optional)

ROLAND PRINTER HIGHLIGHTS

Production Print/Cut is BACK!

One Machine. Every Job. Full Speed. The XG-640 delivers flawless printing and cutting across every material, while keeping production and profits running at full throttle.

The next-generation XG-640 is Roland's fastest printer/cutter ever—built for shops that need to keep jobs moving and revenue growing. Whether you're producing vehicle wraps, decals, signs or display graphics, the XG delivers a whole new level of productivity and versatility that turns printing into profits.

As Roland's most productive integrated printer/cutter to date, the XG is nearly twice as fast as the productive VG3-640. It uses advanced dual staggered printheads allow for top print speeds of up to 819 sqft/hr.

On top of the speed, this printer offers exceptional vibrancy with new TR3 eco-solvent inks, available in dual CMYK or expanded gamut 8-color configurations including Orange, Green, and White options. This printer is one you have to check out!

Call 888-865-0300 or email info@tyrrelltech.com for info.

UV Printing to Objects at its Finest

Expand your business with the high-definition, high-speed digital printing of the VersaOBJECT MO Series. These advanced UV flatbed printers give you the power to dominate a growing direct-print market through high quality printing and high productivity.

Reproduce small letters, fine textures, gradations, and color-matched graphics with ease. Do more with staggered printheads, powerful UV lamps, and an A2 or A3 print bed. Print directly on substrates and three-dimensional objects up to 8 inches thick, including cylindrical items with an optional rotary attachment.

Check out the MO-180 (12"x18") and the MO-240 (18"x24")

Call 888-865-0300 or email info@tyrrelltech.com for more info!

MIMAKI UV MACHINE HIGHLIGHTS

4x4 Flatbed For Big Printing in Small Spaces!

The Mimaki JFX200-1213 EX medium-format UV-LED flatbed printer

is engineered for small to medium volume production, offering wide-format printing capabilities in a compact footprint. It finally meets the needs of print service providers and in-house print shops with limited space, delivering high-quality outputs across various applications, including textured surfaces, ADA-compliant signage, and jig workflows.

This machine's compact medium format design enables businesses to expand their production capabilities without requiring the space of a traditional wide-format printer. This machine can be outfitted with a range of inks for printing to a wide range of rigid and flexible surfaces. It is also capable of producing 2.5D textures and ADA signage to suit some custom/niche needs.

The current promotion can outfit this machine with an ionizer for free- help tackle static that can build up on the surface of certain print media and eliminate the chaos it can cause.

Call 888-865-0300 or email info@tyrrelltech.com to learn more.

Small Format UV Solutions from Mimaki- UJF

Discover the Mimaki UJF Series, a versatile range of UV-LED tabletop flatbed printers designed for direct printing on a variety of materials.

Perfect for creating unique, high-quality graphics with exceptional precision and reliability across multiple applications. Ideal for small to medium-sized production runs, the UJF series offers unparalleled flexibility and cutting-edge technology to meet the demands of modern printing businesses.

A cool accessory that makes this printer so versatile- The Kebab HS is the latest in the line of Kebab cylindrical printers for the UJF Series. It enables 360° printing on flat and tapered cylinders. It is compatible with special inks including primer, white, and clear gloss effects. Great for printing onto cylindrical objects like tumblers, glassware, vases, water bottles, plastic ware of a wide range of materials including, metals, glass, plastics, wood.

COOL TOOLS

Cutworx CWT Laminating & Mounting Tables

Revolutionize Your Application Efficiency with CWT Work Tables

CWT Worktools offers high-performance flatbed applicators and work tables, designed to streamline production workflows for signage, vehicle wraps, laminating, and large-format graphics. With ergonomic designs, precision engineering, and automation features, CWT Worktables enhance efficiency, accuracy, and profitability for print shops and graphic professionals.

There are three product lines to choose from-

CWT Premium Series: The most refined CWT flatbed applicator, ideal for high-volume production. The CWT Premium Series is equipped with advanced features such as electronic height adjustment, an illuminated worktable, and roll holders, making it perfect for extended, uninterrupted shifts.

CWT Classic Series: A balanced and reliable choice, the CWT Classic (formerly "Regular") Series is a favorite among sign makers and digital printers. It offers essential features with a wider working width, making it suitable for a variety of standard substrates and media widths. Perfect for everyday challenges and diverse applications.

CWT Advantage Series: Compact yet robust, the CWT Advantage Series is designed for smaller spaces and entry-level applications. It provides exceptional value for money, offering affordable access to flatbed technology without compromising on quality. This makes it ideal for producing smaller signs, posters, and road signs.

We have demo machines in all of our TyrrellTech offices. Call or email today for pricing or for a demo. With these machines, we can say from experience- seeing is believing.
