## Mimaki UV DTF Is New On the Scene...

The Mimaki UJV300DTF-75 printer is their first purpose-built UV-DTF (direct-to-film) printer, designed to easily produce vibrant, durable transfers including curved or uneven surfaces using a dedicated film system.

What is UV DTF good for? Well, this print technology is meant to make transfers that go onto solid objects (not apparel)- including but not limited to mugs, boxes, helmets and more.

With stable media handling, next-generation UV inks, and user-friendly operation, it opens up new possibilities for customized goods production.

- \* Personalize objects
- \* Compact and efficient
- \* Automated inline lamination
- \* No weeding required
- \* One-touch media loading
- \* Specialized film handling rollers
- \* Next generation UV curable inks

Call 888-865-0300 or email [info@tyrrelltech.com](mailto:info@tyrrelltech.com) to learn more!

If your habits don't change, you won't have a New Year. You will just have another year..

"Cheers to a new year and another chance for us to get it right!"

-Oprah Winfrey

## ENGRAVER CORNER

### Gravotech LS100 CO2 Laser Engraver

TyrrellTech has always tried to have a range of laser engraver offerings that work for everyone. We began with the Universal Laser Brand, and have added both Gravotech laser engravers and, more recently, ComMarker UV lasers. The idea is that we have a machine of every size and laser strength to suit each customer's needs.

The addition of the Gravotech line was meant to help fill in some of those very standard, utilitarian needs with something that is easy to run, use and maintain.

The Gravotech LS100 is an enclosed, easy to operate, compact laser engraver. This compact laser engraving machine is suitable for laser cutting and engraving. This laser cutter is built to last.

**ENCLOSED CO2 LASER ENGRAVING MACHINE SUITABLE FOR BEGINNERS AND EXPERTS IN SIGNAGE** - LS100 is the only CO2 laser engraving machine and laser cutter on the market made of one-piece aluminum chassis. It includes CAD/CAM software and an RF laser source.

**OUTSTANDING VALUE FOR A LASER MARKING MACHINE** - The LS100 is a small laser engraver that is perfect for in store usage and customers enjoy seeing their purchases engraved while they wait. This laser marker can be used for many of your applications.

**SIMPLE WORKFLOW, MINIMAL OPERATOR TRAINING REQUIRED** - Automatic touch sensing, embedded control dash-board, and backlit engraving table with a wide front-loading door are just a few features to make your job easier! Low operational noise allows you to comfortably use this engraving machine in retail stores, small shops, and residential areas.

### Ask About our New ComMarker UV Lasers

Mark on a variety of materials quickly, easily and with great quality- it really can be that simple. Call 888-865-0300 or email [info@tyrrelltech.com](mailto:info@tyrrelltech.com) to find out more about ComMarker UV Lasers & see what they can do!

## Universal Laser Systems... Set Apart

Universal Laser Systems has unique systems and methods for laser cutting and processing that deliver flexibility, performance and results that surpass conventional laser material processing tools -- redefining what's possible.

We here at TyrrellTech have represented the Universal Laser Systems brand for many years. While there are other laser engraver brands out there on the market, what has sustained us and our customers is the reliability, versatility and unique assets of the Universal Laser Systems brand. What sets them apart? Well... I am glad you asked...

**Support for multiple laser wavelengths commonly used in materials processing:** 10.6  $\mu\text{m}$  (CO<sub>2</sub>), 9.3  $\mu\text{m}$  (CO<sub>2</sub>), and 1.06  $\mu\text{m}$  (fiber)  
A wide range of air-cooled laser sources for each wavelength, with peak powers ranging from 10 to 300 watts

**Rapid Reconfiguration™ Technology** - Allows users to change laser wavelength and power at any time—without tooling—to process different materials or applications

**MultiWave Hybrid™ Technology** - Combines multiple wavelengths for effective processing of complex materials such as composites

**Automation Interface** - Integrates with external systems (e.g., conveyors, robotics) to automate workflows, reduce manual intervention, and increase production throughput.

**Air Filtration and Handling** - Removes fumes, byproducts, and particulates to protect system components and maintain a clean work environment.

**Camera Registration** - Uses a camera to detect registration marks or virtually any feature as a point of registration and align laser operations accordingly. Enhances accuracy, repeatability, and productivity.

**Class 4 Conversion Module** - Converts a Class 1 laser system into a Class 4 system compliant with CDRH and international safety standards. Enables processing of oversized or irregularly shaped materials.

**Fire Suppression Assistance** - Provides pressurized fire suppressant that can be automatically deployed on the material being processed if high temperatures are detected.

So, join the large group of customers who have run and made money with their Universal Laser Systems machines installed by TyrrellTech over the years- you'll be glad you did!

### 4x4 Flatbed For Big Printing in Small Spaces!

*New Low Price!!*

The Mimaki JFX200-1213 EX medium-format UV-LED flatbed printer is engineered for small to medium

**Mimaki™**

volume production, offering wide-format printing capabilities in a compact footprint. It finally meets the needs of print service providers and in-house print shops with limited space, delivering high-quality outputs across various applications, including textured surfaces, ADA-compliant signage, and jig workflows.

This machine's compact medium format design enables businesses to expand their production capabilities without requiring the space of a traditional wide-format printer. This machine can be outfitted with a range of inks for printing to a wide range of rigid and flexible surfaces. It is also capable of producing 2.5D textures and ADA signage to suit some custom/ niche needs.

**Now with a NEW LOW MSRP of \$59,995!!**
