NEW FROM ROLAND Roland AG-640 Latex Print & Cut in ONE MACHINE

Meet Roland DG's new TrueVis AG-640 – the world's first large-format latex printer/cutter. Combining lower running costs, an expanded color gamut, high-density white ink, and integrated print-and-cut functionality, the AG-640 enables users to move beyond the limitations of other latex solutions by maximizing versatility, delivering stunning output, and increasing efficiency, productivity, and profitability. This next-generation latex machine incorporates new long-life piezo printheads, advanced ink control, improved media pull-back, intelligent curing, and other advanced features, allowing users to produce crisp, colorful, quick-drying graphics in a streamlined, economical workflow.

The AG-640 makes it easy for print professionals to not only exceed customer expectations but also offer a wider range of profitable applications, including everything from vehicle graphics and signage to window displays, tradeshow graphics, decals, and wallcoverings.

MG2 Series UV Printer/Cutters

Check out the new Roland DG TrueVis MG2 Series UV printer/cutters. Offering higher productivity than previous models, as well as specialty ink capability, multilayer printing, integrated contour cutting, and simple operation, these next-generation machines represent a significant step forward in Roland DG's UV print-and-cut platform.

The series is comprised of the 64-inch MG2-640 and the 30-inch MG2-300, both of which are built for print businesses that want immediate curing, expanded application capability, and more efficient specialty production. Ideal for a wide range of applications, including signs and banners, decals and labels, backlit graphics, window graphics, exhibition décor, flexible or paper packaging proofs, and more, the MG2 Series printer/cutters are uniquely engineered to produce stunning UV output quickly, easily, and cost-effectively.

"Life starts all over again when it gets crisp in the fall."

-F. Scott Fitzgerald, American novelist

NEW FROM MIMAKI

Mimaki

The Mimaki UJF200 Series is a benchtop UV-LED flatbed printer designed for direct printing onto rigid and dimensional objects. The series includes UJF200-3042 model and supports objects up to 9.8 inches thick and up to 44 lb. The platform uses a high-precision single printhead with minimum 3 pL droplet control and MAPS4 technology for smooth gradients, fine lettering, and reduced banding. Available ink configurations include CMYK, white, clear, primer, light colors, and fluorescent pink and yellow. Optional camera and belt systems expand the platform from manually loaded direct-to-object printing into automated positioning and continuous production workflows.

This machine is a step up in speed and capabilities- check it out today! Call 888-865-0300 or email info@tyrrelltech.com to learn more.

The JFX220-2515 large-format UV-LED flatbed printer builds on the proven JFX platform with expanded application capabilities, workflow improvements, and greater production flexibility. The JFX220-2515 boasts a new vacuum system that holds down media without masking and an increased bed size for increased production. Print rigid media up to 4 in thick,

create dimensional effects with 2.5D Texture Maker, and expand your creative offering with multiple ink configurations—including options for White, Clear, Primer, Light Cyan, Light Magenta, and Fluorescent Pink & Yellow. Updated operation features, including a touchscreen interface and automatic locating pins, help simplify setup while supporting efficient day-to-day production.

Whether producing signage, displays, décor, promotional graphics, specialty pieces, or dimensional applications, the JFX220-2515 is designed to give print providers more ways to turn ideas into high-value output. Call 888-865-0300 or email info@tyrrelltech.com to learn more.

ENGRAVER CORNER

Universal Laser's Migration Promotion!

Universal Laser Systems has made countless laser engravers that have been running in shops for 10, 15, even 20 years. They make a machine that keeps on working forever- known for their reliability in the industry.

Universal Laser Systems has launched a new migration program designed to help customers operating legacy M, V, and X Series systems- to help them transition to modern VLS platforms.

This initiative provides a compelling upgrade path for customers using technology that is often more than 20 years old while preserving familiar workflows and improving long-term supportability, reliability, and performance.

It's easy...

- * Keep your existing laser tube that's working.
- * Send back the CPU from your old machine and get super special pricing on a new platform that will work with your existing laser tube.

- * PLUS... get these additional benefits:

TWO year warranty

Free one touch software

Free direct import software

- * And save money on a new reliable ULS machine!

Seems like a no-brainer, right?

The 90's called... they want their laser back... time to upgrade!

Call 888-865-0300 or email info@tyrrelltech.com for more info.

Universal Laser's Desktop Laser Solution

The new VLS 3.60ES is a compact desktop laser system designed for multi-user environments such as educational settings, laboratories, and shared spaces within businesses. For operators, it offers a rich set of features and capabilities that enhance productivity, operational efficiency, usability, and safety. For administrators, it provides access control and support capabilities to effectively monitor and manage system use and performance.

The VLS 3.60ES laser system features a 24 x 12-inch material processing area equipped with an integrated camera vision system to aid users in precisely aligning design files with materials placed on the laser processing support surface.

The desktop is driven by the user-friendly, yet powerful control software, Laser System Manager, with capabilities beneficial for beginning and advanced users as well as administrators such as:

Additionally, its robust design and set of safety features help minimize potential hazards for safe laser processing. Safety features include laminated safety glass, redundant safety interlocks, Overtemperature Detection Alarm, Emergency Stop (E-Stop) Push Button, and Enhanced Fault Detection to monitor the status of the laser source and any accessories installed. For added protection, an optional Fire Suppression Assistance Module is also available.

MORE NEW STUFF FROM MIMAKI

TXF330 - New Direct To Film Technology

The Mimaki TxF330-800 is a 31.5-inch DTF (Direct To Film) printer designed to combine high productivity, reliable operation, and expanded color capability for apparel and textile decoration.

The all new TxF330-800 is built on the success of Mimaki's popular TXF models, and it delivers smooth gradations, dense solid colors, and detailed output while providing two ink configurations that allow businesses to prioritize either production efficiency or greater creative versatility.

Choose a 4-color + White configuration for productivity-focused operation or expand to 6-color + White with Sky Blue and Pale Pink for a wider range of vivid color reproduction. Automated

nozzle monitoring, nozzle recovery, full white ink circulation, and remote operation technologies help maintain stable output while reducing operator intervention during longer production runs.

Call 888-865-0300 or email info@tyrrelltech.com to see one in action today!

Mimaki's New Hybrid (Roll/Rigid) UV Printer

Introducing the new Mimaki UJ330H-160 — the most advanced Mimaki hybrid printer ever.

Engineered to expand your possibilities, it seamlessly handles an exceptional range of roll and rigid media, giving you the freedom to take on more jobs with confidence.

Powered by Mimaki's proven 330 series print engine, the UJ330H-160 delivers the perfect balance of speed and precision. Its dual printheads and 6 color configuration offer flexible setups, including - x2 CMYK or CMYK + Clear + White, or CMYK + Light Cyan + Light Magenta + White.

Designed for versatility, the printer features a generous 2" head clearance and an innovative vacuum transport belt system that eliminates pinch rollers - minimizing marks and enabling smooth, accurate printing on even the thinnest media.

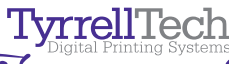

With resolutions up to 1200 x 1800 dpi and Mimaki's complete suite of core technologies - NCU, NRS, DAS2, VDT, MWDT, MAPS4, and Mimaki PICT—you gain smarter automation, consistent performance, and the power to monitor everything from ink usage to production status right from your phone.

Capable of 5 layer and 2.5D texture printing, the UJ330H-160 delivers a truly robust, intuitive hybrid experience. It's the all in one printing solution built to elevate quality, expand capability, and keep your business ahead of the competition.

HOT DEAL ON A GREAT LASER

Laminating & Mounting Tables for the WIN!

CWT Worktools offers high performance flatbed applicators and work tables, designed to streamline production workflows for signage, vehicle wraps, laminating, and large-format graphics. With ergonomic designs, precision engineering, and automation features, CWT Worktables enhance efficiency, accuracy, and profitability for print shops and graphic professionals.

Check out the CWT 1428 table- perfect for mounting and laminating 4' x 8' boards in seconds. It's easy to say, "I can do this with my roll laminator," and you certainly can... but WOW does having a place to set the board on a table and fix it in place make it easier and more error free. And repeatable.

It's hard not to see the benefit of a worktable list this- call a showroom today and set up a time to come and use one yourself. You will be a believer! Call 888-865-0300 or email info@tyrrelltech.com to learn more.
